Extended Warranty

Your new tool runs under full Evatec warranty, but what happens when it ends? We extend the warranty for your whole tool, so the same protection continues as your production grows.

Your need

Do you find yourself answering yes to any of these?

- Is your tool warranty ending just as production volume ramps up?
- Would one unplanned repair put pressure on a budget that is already fixed?
- Do you want one partner responsible for the whole tool, rather than handling each issue separately?

Our service

Extended Warranty continues the protection of your standard Evatec warranty for your whole tool. Defective parts are repaired or replaced, and qualified Evatec Field Service Engineers support you on-site or remotely. Book it with your tool order or before your standard warranty ends, and you receive one fixed price for the agreed period.

Your benefit

- Protect your investment beyond the standard warranty period.
- Turn unexpected repair costs into a fixed, budgeted amount.
- Replace defective parts without raising a new purchase order for each repair.
- Keep the Evatec service level you know as your tool moves into full production.

Want to know more?

Extended Warranty works well on its own and even better combined with Preventive Maintenance to keep your tool in top condition or a Spare Parts Kit for the consumable parts outside the warranty.
