Spare Parts | Support | Training | Retrofit

Consignment stock

If you always want to have access to spare parts why not build up your own stock in consignment? We will manage your stock and make sure that you always have the right quantity and quality of parts and consumables.

Your need	 Depending upon your own circumstances you may face one of the following needs: Do you need to know which Spare Parts (SP) you use most or which SP are the most critical ones for you tools? We will advise you which parts you should stock! Do you want to be sure that you have always immediate access to the most critical SP and consumables? We will manage the components you want within your stock.
Our service	 Together we will define which SP you want to have on stock. We maintain the SP stocks of each part always on a pre-agreed level . The following elements characterize this service: SP and consumables are in consignment stock at customer site SP and consumables remain Evatec property Any SP used from consignment stock will be charged to the customer and the stock replenished yearly stock check; refill & exchange old SP/consumables if needed day to day reporting of parts removed from stock is customer responsibility Our service comprises the following 4 steps: Identify needs Define SP in consignment-stock and processes Negotiate conditions Put in place service contract for consignment stock
Your benefit	 You do not have to care about the availability of your defined critical Spare Parts – because they are constantly at your site. Your profit from the following benefits: You can focus on your core business You reduce your predicted and unpredicted downtime because you always have direct access to the relevant Spare Parts and Consumables You can optimize your stocking and Supply Chain Management No waiting time (shipment, request, purchase process,)
