Spare Parts

Spare Parts Kits

Is the right part on your shelf when your tool needs it? We build Spare Parts Kits for your specific tool, including consumables, and deliver them on a plan that fits your production.

Your need

Do you find yourself answering yes to any of these?

- Is your tool waiting for a part that could have been on your shelf?
- Is your new tool starting production and you are unsure which spares to stock?
- Is planned maintenance delayed because parts or consumables arrive late?

Our service

Together with you, our spare parts specialists define a kit based on your tool configuration, its lifecycle phase and your production plan. The kit covers critical spare parts, wear parts and consumables, delivered on an agreed schedule. You receive original Evatec parts, ready when your tool needs them.

Your benefit

- Avoid downtime with critical parts on-site instead of in transit.
- Keep process quality stable with original Evatec parts and consumables.
- Plan maintenance with confidence, knowing the parts are ready.
- Simplify purchasing with one planned order instead of many urgent ones.

Want to know more?

Spare Parts Kits work well on their own or as part of your new tool order and even better combined with a Health Check to define what your tool needs, Preventive Maintenance or Consignment Stock if you prefer not to hold the inventory yourself.
