Spare Parts

Consignment Stock

Need critical parts at your fab without tying up capital in inventory? We place Evatec spare parts at your site, you pay as you use them and we keep the stock at the agreed level.

Your need

Do you find yourself answering yes to any of these?

- Is your tool waiting while shipment and purchasing run their course?
- Do you want critical spares on-site without paying for the inventory upfront?
- Is managing your own spare parts stock taking time and capital away from production?

Our service

Together with you, we define which spare parts and consumables to hold at your site and at what levels. The stock remains Evatec property until you use it. You report each part you take, we invoice it and replenish the stock. Once a year we review the stock with you and replace parts where needed. You receive critical parts within reach, paid as you use them.

Your benefit

- Take critical parts from your own site instead of waiting for shipment.
- Keep capital free, since you pay for parts as you take them, not upfront.
- Replace many urgent purchase orders with one agreement.
- Keep the right parts on hand with a yearly review by Evatec.

Want to know more?

Consignment Stock works well on its own and even better combined with a Health Check to identify your critical parts or the Exchange Program for high-value parts you prefer not to stock.
